## Purpose of this Manual

This User's Manual contains the full description of the SP5650 Sensor Holder for SP5600 Unit.

## Change Document Record

Date	Revision	Changes
25 November 2011	00	Initial release
10 January 2018	01	Completed revised layout and Updated Sensor

## Symbols, abbreviated terms and notation

**MADE IN ITALY:** We stress the fact that all the boards are made in Italy because in this globalized world, where getting the lowest possible price for products sometimes translates into poor pay and working conditions for the people who make them, at least you know that who made your board was reasonably paid and worked in a safe environment. (this obviously applies only to the boards marked "MADE IN ITALY", we cannot attest to the manufacturing process of "third party" boards).

## Overview

The SP5650 is the family of sensor holders provided in the Educational/Evaluation kits. The holders host a  $1.3 \times 1.3 \text{ mm}^2$  Silicon PhotoMultipliers; moreover, a probe inside the holder senses temperature variations, thus allowing the user to compensate for possible gain instability.

The SP5650 is made of a mechanical structure providing a FC fiber connector and a PCB where the SiPM is soldered.

Bias voltage for the SiPM and temperature probe output are provided through a 10 pin female socket, while the analog output connector is MCX.

The holders are designed to fit a large number of SiPM pin-outs and packages, allowing the user to either modify the mechanical structure and to solder different kinds of SiPMs choosing the preferred pads.

## Mechanical Drawings

As stated above, SP5650 mechanical structure is made of two different parts: an aluminium external holder, providing the FC fiber connector and a 1 mm pin hole and an internal PVC holder, which provides the mechanical connection for the SP5600 front panel and houses the SiPM soldered in the PCB.

Thanks to this solution the user can easily modify the internal holder to fit different SiPM packages.

**Fig.1:** Mechanical drawings of SP5650 external holder

**Fig.2:** Front and Back view of the external aluminum holder

Technical drawing of a mechanical part, likely a flange or end plate, showing multiple views and dimensions.

**Front View (Top Left):** Shows a circular part with a central hole. Dimensions include:
 

- Outer diameter:  $\phi 35.0$
- Inner diameter:  $\phi 22.0$
- Central hole diameter:  $\phi 6.0$  (tolerance  $+0/-0.1$ )
- Inner ring diameter:  $\phi 15.0$
- Small hole diameter:  $\phi 2.7$
- Small hole diameter:  $\phi 4.0$
- Section line A-A is indicated.

**Top View (Bottom Left):** Shows the top of the part with dimensions:
 

- Overall width: 64
- Overall height: 20

**Bottom View (Bottom Right):** Shows the bottom of the part with dimensions:
 

- Outer diameter:  $\phi 35.0$
- Inner diameter:  $\phi 22.0$
- Central hole diameter:  $\phi 6.0$  (tolerance  $+0/-0.1$ )
- Inner ring diameter:  $\phi 15.0$
- Small hole diameter:  $\phi 2.7$
- Small hole diameter:  $\phi 4.0$

**Section A-A (Middle):** Shows a cross-section of the part, indicating a thickness of 14.

**Isometric View (Top Right):** Shows the part from a 3D perspective, labeled TOP and BOTTOM.

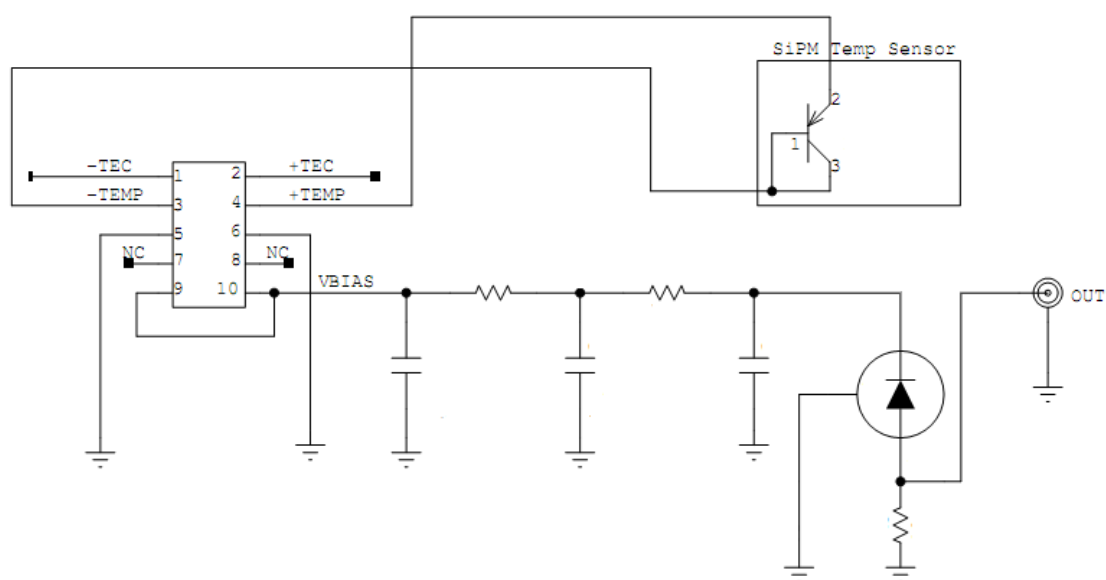

**Fig.3:** Mechanical drawings of SP5650 internal holder

**Fig.4:** Front and Back views of the internal PVC holder

## Electrical Schemes

The PCB is designed to host the SiPM and the temperature probe. It is provided with different soldering pads for anode (A), cathode (K) and case (C) in order to fit the pin out of SiPM provided by different manufacturers.

**Fig.5:** Electrical Scheme of SP5650 PCB

**Fig.6:** Left: front view of the SP5650 PCB. The 1x1 mm<sup>2</sup> SiPM is clearly noticeable. Right: back view of the SP5650 PCB

## Technical specifications

<b>Packaging</b>	
Size	20 mm (diameter) x 6 mm (height)
<b>Analog Out Connector</b>	
RADIAL: R113425000 (MCX MALE)	
<b>Bias Connector</b>	
M22-7140542 Female Vertical Socket	
<b>Ordering codes</b>	
WSP5650XCAA	with HAMAMATSU 1.3x1.3 mm <sup>2</sup> -50C
WSP5650XZAA	with No Sensor
